EcoLuxe + Equilibrium

October, 28th 10 am-12 pm

THIS IS A TWO PART SEMINAR NOT TO BE MISSED!!

10 am

Eco-Luxe Design for a Sustainable Interior

Barbara Nyke, principal and accredited Interior Decorator of NIKKA DESIGN, and Eco-design specialist will explore why and how the design industry has moved in the direction of sustainable interiors. She will address why increasing consumer demands for and awareness of sustainable products require design and build professionals to educate themselves to serve this increasingly popular demand.

What does Sustainable Design entail and how can it be achieved will also be topics addressed. This seminar will explore sustainable materials that have minimal to no impact on the earth, help to improve indoor air quality, improve energy efficiency and also gives the client complete choice of aesthetics.

11 am

Equilibrium-Changing Housing for a Changing World

Mark Salerno, District Manager, Greater Toronto Area, Member, National Management Team, Canada Mortgage & Housing Corporation (CMHC) will speak about forward thinking trends and initiatives that are changing Canada's housing industry.

Mark is a recognized expert in sustainable housing and community design and is CMHC's media spokesperson on a broad range of housing issues.

Mark is one of 250 Canadians personally trained by U.S. Vice President Al Gore to present the live version of 'An Inconvenient Truth' as part of the Climate Project Canada Initiative.

Through CMHC, he works to foster public, private partnerships and coalitions in support of the creation of sustainable housing and communities. In this regard, he has spearheaded many successful sustainable housing demonstration initiatives such as Home 2000, The Sustainable Condo, and most recently the canühome. Collectively, they have been visited by over 300,000 people and have garnered significant media coverage including CTV's Live Earth telecast, Canada AM, and countless TV/Radio news spots, newspaper/magazine articles.

Through his former CMHC position ('98-'02), Sr Research Consultant, BC/Yukon, he managed over \$2 million in research projects related to enhancing the energy efficiency and moisture management of building envelope assemblies.

Seating is limited so register for one or for all today.

Cost: \$20
